

Updates: Harmonic Equation of Ascension

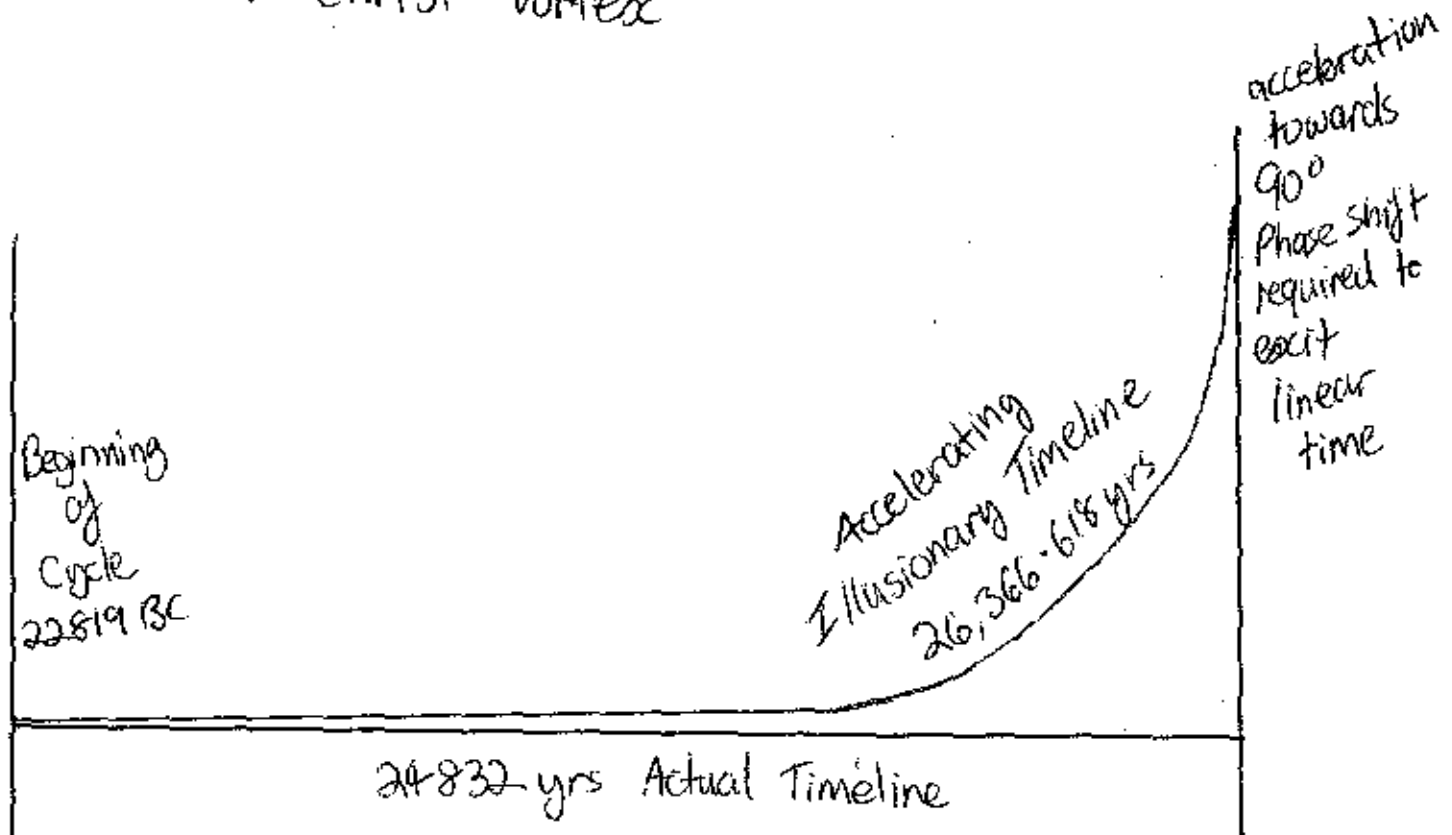

The wavelength of our DNA Helix is 34 angstroms. Our current state of Being is below oneness or below unity. To overcome this predicament we will need to, just prior to the completion of our precessional cycle for Life Eternal, merge via the Golden Ratio Spiral with our 5th dimensional Light Bodies, also known as our nesting Icosa Dodeca.

This will need to happen on or before the 21st December 2012. Icosa = 20 Dodeca = 12

$$\begin{aligned}
 (\text{DNA Spiral Wavelength}) & 34 \times \frac{1}{\phi} \text{ (Golden Ratio Spiral below oneness)} \\
 & = 21.012 \text{ (21st December' 2012)}
 \end{aligned}$$

Ascension will occur at the completion of the cycle which ends on 21st March 2013 or first Equinox of 2013. Yes we and our beloved Mother Earth will ascend on this day. For ascension to occur our DNA Helix needs to integrate with the Golden Ratio Spiral or Christ Vortex. In other words the Christ energy needs to be injected into our DNA Helix.

The above graph depicts the 24,832-yr time line, which is the journey of this reality in real terms, and the 26,366.618 yr time line of the Great Illusion.

I feel the need to share with you an explanation so that you may better understand how it is I see the numbers.

Everything in this Universe is made up of frequency, vibrational patterns and colours. When you look at a particular colour, one can see other colour components which come together to manifest the colour in question. Take purple for example, which contains Red and Blue.

$$\text{Red} + \text{Blue} = \text{Purple}$$

The same applies when manifesting realities. A variety of vibrational patterns or differing components are arranged in which ever way is required, for manifesting any particular reality.

Understanding that this Universe is a mathematical construct, the vibrational patterns and colours are represented numerically. So therefore when one looks at a series or sequence of numbers the individual components represented harmonically by number values are identified.

Now I'm not saying I'm an expert and can identify every single number because I am still at kindergarten with all this stuff but I do feel with time running out that it's important to share my understandings as they manifest.

Also Gematria is an ancient code where the letters of certain alphabets have been assigned numerical values. This was done for the Old Testament with the ancient Hebrew Alphabet and since the New Testament was originally written in Ancient Greek, that Alphabet was utilized.

It enabled the authors of these ancient scriptures who had the foresight and understandings that the next milenia or two would be troubled times, requiring their scriptures to withstand gross manipulations by those seeking to use them for mis-leading and controlling the people.

The authors knew that this Universe is a mathematical construct and therefore understanding the secret codes, they knew words are more easily manipulated to alter meanings. But sacred numbers, sacred geometry and especially buildings and monuments constructed in this manner withstand the test of time and even transcend cultural boundaries.

I truelyly resonate with Gematria and I feel it is one of the true Bible Codes.

The calculations speak for themselves.

The calculations continue, The synchronicities continue
The Revelations Continue.

$$24832 \times (\phi + \pi) = \underbrace{118190.2047}_{\substack{\text{The Gateway} \\ \text{Two Pillars}}} \underbrace{2047}_{\substack{\text{matter} \quad \text{spirit} \\ \text{The age of the} \\ \text{incarnated Solar} \\ \text{Logos in 2013}}}$$

Through this precessional cycle for Life Eternal, the Solar Logos in 2013 will utilize the 8192 or 81918 frequency turning matter into spirit as it enters the gateway into Life Eternal.

$$\frac{\text{DNA Wavelength } 34}{\text{DNA Amplitude } 20} = 1.7$$

$$\frac{24832}{(\phi + \pi)} = 5217$$

$$24832/34 = 730.352$$

730 correlates with 729 = Cephas, the name of the foundation stone of Christianity and the Solar Omphalos name of Apollo. It is also the number of Delphinion, the name of the temple of Apollo at Delphi. 729 is also the number of the Sun in Plutarch's Pythagorean essays and the harmonic of the Pythagorean 27×27 magic square which represents the construct of Earth's orbit around the Sun.

352 = The Path, and also correlates with 353 = Hermes and 354 = The God,

The Gematria value of 9999 is found on the Solar amulets worn by initiates that had obtained Gnosis during the Hellenistic period.

$$81918/8192 = 9.999$$

$$8192 \times \sqrt{\phi} = \underbrace{10403}_{\text{Microcosm}} \cdot \underbrace{84}_{\text{Sacred Union}} \quad \text{Trinity} \quad \text{Matter}$$

$$8192 / 32^\circ = 256 \text{ (2545 harmonic etc)}$$

$$8192 / 24 = \underbrace{341}_{\text{DNA}} \cdot \underbrace{333}_{2013} \quad \text{unity} \quad \text{Recurring} \quad \text{Infinite Trinity}$$

There are many layers to each sequence. For example the above sequence is also;

$$341 \cdot 333 \text{ — Trinity Recurring Infinitely}$$

Trinity | matter | unity

so one may say the cycle set up by the Holy Trinity of Light will bring matter back to unity/oneness and into the Holy Triangle of Light for Life Eternal.

Just to revamp briefly the significance of the 260.

It is the duration of Human gestation and the duration of our Planetary gestation within the Mayan Longcount Calender.

It is also the 8x8 magic square harmonic.

It is a very significant number.

$$260 \times \pi = \underbrace{816}_{\frac{1}{\phi} \text{ reversed}} \text{ (815 Zoe or Life)}$$

$$681 (\text{Planet}) / 260 = \underbrace{2.619}_{\substack{260 \\ 618 \frac{1}{\phi}}} \text{ (619 = Delphi and Pythion)}$$

$$\text{Sophia } 781 / 260 = 3 \text{ (Trinity)}$$

$$\text{Sophia } 781 + 260 = 1041 \text{ (1040 microcosm)}$$

$$\text{Planet } 681 - 260 = 421 = \text{Fruit}$$

It is by our Fruits that we shall be known.

$$\text{Gaia } 10 + 260 = 270 \text{ (27x27 magic square)}$$

$$\text{Gaia } 15 \times 260 = \underbrace{3900}_{\substack{389 = \text{The Stone} \\ 388 = \text{The Sun}}}$$

Interestingly if you combine the results for both spellings of Gaia and Gaia we end up with:

3, 9, 27 sacred sequence of Pythagoras

$$\{ \text{Gaia } 10 + 260 \} \times \{ \text{Gaia } 15 \times 260 \} = \underbrace{1053000}$$

$$\sqrt{260} = \underbrace{16.12}_{\substack{\phi \\ \text{Zeus}}} - 12 \text{ months, Apostles, Angelic Councils, etc.}$$

I now wish to share with you what I feel is incredibly important. This is what I understand about our friend π .

π to me is about the relationship between the Feminine, the circle, and the Masculine, the line. It is the Divine Ratio of our Heavenly Mother and Heavenly Father.

If we take π and inject it into the sphere of The Mother, the complete circle, completion, wholeness or oneness the result speaks for itself.
